

Power from the socket for  
compressor coolers with Danfoss  
BD35F compressor

Automatic priority circuit for mains  
operation

## EPS-100W : MOBITRONIC 230-volt rectifier

For problem-free connection to 230-volt mains. Suitable for all COOLMATIC coolers with Danfoss BD35F compressor.

**Mains voltage:** 230 volts AC

**Output voltage:** 24 volts DC

**Output power:** 100 watts

**Dimensions  
(WxHxD):** 115 x 65 x 170 mm

**Weight:** approx. 0.7 kg

**Quality features:** Switch mode, automatic priority circuit  
for mains operation

**Test marks:** GS, CE

**Product Ref:** **EPS-100W**
